

ACTIVITY

Bootstrap Theme, Font-Awesome, DataTables

Instructions

Use your previous MVC application activity in C# and add the following features to the application:

1. Select a new bootstrap theme in bootswatch and apply the theme on your web app
2. Add the font-awesome library and implement icons on the buttons of your CRUD web pages
3. Use DataTables on all the tables of your application
4. Make modifications to your previously created project named [Last name] – ENTPROG-[Section] (i.e. Sy – ENTPROG-OTIS1)
5. Compress the updated solution as a .zip file (Not .rar or other compression) for submission to the drop box.

Important Reminders

- Review the Bootstrap Theme, Font-Awesome, and DataTables Mastery Rubric to understand how you will be graded
