

Instructions

Hi there,

I need a help in representing the data into bars and a table. I have two tasks as described below.

- ⑩ In the spreadsheet, there are three tables in three different colors. I want each table to be represented in a separate Diverging Stacked bar, preferably as the picture below..

- ⑩ I would also need a table that represent the: Median, Mean, Max, and Min for the data. Please refer to the Table 2. Same with the first task, I would like to have three different tables ideally as shown below

Thank		Mean	Median	Mode	SD	you
very	My accent in English shows my cultural identity.	2.97	3	3	0.97	much,
	I like my accent in English because it shows who I am and where I have come from.	2.79	3	3	0.98	
	I would like it if people thought I was an American and a native English speaker.	3.59	4	4	1.01
